

FSCT 9840 FORENSIC NURSE EXAMINER CORE ED. GRADUATE CERTIFICATE IN FORENSIC HEALTH SCIENCES

This course provides the forensic knowledge and skills for forensic health assessments, evidence collection, chain-of-custody, medicolegal documentation and evaluation of victims of sexual violence (adult and adolescent). The course prepares registered nurses for the role of a forensic nurse examiner within forensic nursing programs. Instructors are industry experts from within healthcare, law enforcement, criminal justice and forensic sciences. Students will complete an individual assignment and an analytical paper and exams.

LEARNING OUTCOMES:

- Recognize the clinical nursing/ medical/ forensic and scientific body of knowledge and principles associated with the care of victims of sexual violence (adult and adolescent).
- Evaluate current literature and statistics surrounding sexual violence.
- Discuss self-care for the forensic nurse examiner.
- Develop a comprehensive forensic health care plan for the collection, examination and evaluation of forensic evidence involving victims of sexual violence including secure storage and access to evidence and information.
